

We would like to make changes to our webpage. We are interested in adding more color into the elements listed below. We would like to see how the orange in the main page picture looks in some of these areas.

- Enhance the "Autumn Knoxville" file so that the clouds are not as grey and the picture is overall brighter

**Open the "Main Page Guide" file.**

- Change buttons 3-6 on the right side of the page. We want them to look similar to iPhone icons with a bit of color so that they pop and come off the page.
- We would like the call today icon #1 on the left bar, to be appealing and have similar elements to icons 3-6.
- Change #2 icons as well.
- Design a new menu bar that matches the elements that you redesigned, so that the whole website flows.
- Replace the social icons above #2 to flow.
- We need a coupon icon similar to icons 3-6, it should say "10% off carpet cleaning" and have a place for an expiration date.

**Open "Commercial Page Mock" file.**

- We need an icon that just says "Request a Quote" for the left bar of the page.

**Open "Photo Guide" file.**

- Three pages are going to rotate photos: Main Page, Carpet Cleaning Page, & Emergency Services Page
- We need to add the text listed in the "Photo Guide" to the corresponding photos with the look and feel of the overall site.
