

Solar Power

I like the panel design less the arrows

USB Power

Do not like the USB symbol, I need a symbol that conveys USB Without looking like a USB symbol

RF Power

RF Power is new, typical symbols to start with. This symbol has the same meaning as the bluetooth or wifi. A industry standard.

Induction Power

the qi symbol is the standard's symbol. I would like something more like the induction coils. With and without the qi symbol

They should be scalable without losing resolution, all logos should have similar color matching  
Total of 4 logos, with the names placed some how. Ideally the logo and the name should be separable

Sample outside shapes
