- ◆ Approx. dimensions: 8.5" x 2.7" x 1"
- ◆ Comfortable, Sculpted Hand-Held Design

## DESCRIPTION

Whether you need 100 custom remotes or 100,000, the Innotech Systems Customizable II Universal Remote is the latest solution. You may define your own proprietary key codes, draw from the comprehensive Innotech Systems remote control library of entertainment system codes, or combine both for high end applications such as home theater and PC/TV.

The appearance of your design is uniquely yours, through the use of an easily modified overlay and keypad. You define the layout for designs of up to 64 keys, including an ergonomically located navigator section. The remote control uses a standard plastic enclosure, thus saving on the high design and toolings costs associated with custom plastic tooling. Unused key positions are simply masked out.
