

## Mold Testing & Mold Inspection

MOLD testing is the process by which an Indoor Air Quality professional tests for mold in an indoor environment.

MOLD is everywhere in our environment. It is an important part of our ecosystem as it plays a major role in the decomposition of decaying plant matter. Mold testing is performed around the principle of comparative analysis. Having mold in an indoor environment in and of itself is not a problem. However, mold becomes a potential health problem when indoor concentrations reach levels far and above normal human exposure limits.

Mold can start to grow in as little as 24-48 hours after a moisture or water intrusion.

## Symptoms of Toxic Mold Syndrome

The mycotoxins produced by toxic mold create environmentally toxic air that affects the body's myelin, depleting this important substance that covers the nerves. The nerves are exposed without protection and fail to function correctly. This affects essential components of the body, including: the immune system, the nervous system, the respiratory system, the skin, and the gastrointestinal system. When toxic mold causes neurological problems, it can be devastating to children since their brains and other organs are not fully developed.

## Mold and your Pets

Mold can even affect the health of your pets! Medical Mycologists (fungi specialists) agree that animals are no less susceptible to the threat of mold than humans. Small mammal pets are often the first to experience the symptoms and health repercussions of living in a home with elevated levels of mold.

Just like humans; wheezing, sneezing, runny nose, watery or itchy eyes are common in pets that are exposed to high concentrations of indoor mold.

## Identify the Problem

First: Home Enviro identifies the problem. During the mold inspection we will pinpoint the problem areas in your home or building using our latest tools and techniques.

Second: Home Enviro determines the cause of the mold growth. Mold requires water or a source of excessive moisture to grow, that's why Home Enviro is pleased to offer our Thermal Imaging Infrared Camera during our mold inspection to allow us to evaluate if a non-visible area is wet, even if there is no visible surface damage. Our professional mold inspectors will test your property for mold growth using the latest tools and techniques.

Third: We outline our recommendations. Home Enviro provides expert advice and mold removal consultation specifically tailored to your unique situation.

## What's behind your walls? State of the art technology at your service...

Our Thermal Imaging Infrared Camera is a valuable diagnostic tool used to measure surface temperature.

This allows us to evaluate if a non-visible area is wet, even if there is no visible surface damage.

Our highly trained staff of Thermographers will determine potential moisture intrusion issues.

Fast action and proper attention prevents secondary damages such as mold growth, structural damage and dangerous health issues.

Home Enviro inspectors are specialists at detecting signs of hidden leaks & moisture behind walls using infrared thermal imaging.

## Mold Remediation

MOLD: This little four-letter word can strike fear into the heart of home and business owners alike. But mold problems don't have to be the end of the world.

Anyone can remove mold, but it takes a mold remediation professional to do it right. If mold remediation is done improperly, it can easily do more harm than good. Home Enviro will develop a mold remediation plan specific for your needs, ensuring your problem is remedied quickly and effectively. All of our technicians are certified in mold remediation and receive extensive ongoing education and training.

## Home Enviro leads the industry with our 10 STEP mold remediation process:

Prepare the site  
Contain the area  
Achieve negative air pressure  
Remove damaged materials  
Soda Blasting Process (If Needed)  
HEPA vacuum and clean-up  
Apply antimicrobial treatment  
Conduct clearance testing (No Conflict Of Interest Third-Party Clearance Testing)  
Remove containment  
Apply mold prevention coating (10 YEAR WARRANTY!)

NO CONFLICT OF INTEREST  
Home Enviro, Inc. can't perform both mold inspection and mold remediation for our customers at the same time and location.

## Direct Insurance Billing

Home Enviro provides direct insurance billing services as a convenience to our customers. We are experienced in managing claims and managing the proper documentation process. This allows our customers to focus on managing their lives instead of the details of their mold or water loss claim.
