DIVERSIFIED LTD**
SINCE 1986

BUILDING COMMUNITIES, ONE HOME AT A TIME

Construction Diversified brings 50 years of building experience to every project.

The history of Construction Diversified begins with our founder, Douglas “Doug” Barr. Growing up in Florida, he personally experienced the loss and devastation incurred from Mother Nature’s wrath. Hurricane Donna, the 8th strongest hurricane on record to strike the United States, struck his home state with unprecedented fury in 1960. Over 300 deaths and upwards of \$900 million in damage was attributed to Hurricane Donna.

The experience had a profound effect on Mr. Barr. Many of his friends and neighbors no longer had homes to go back to, or their homes were so badly damaged they were virtually uninhabitable. Mr. Barr immediately went to work rebuilding his community and in 1964 started his own business performing insurance loss repairs. His integrity showed and he soon expanded to building subdivisions with a reputation for quality and superior craftsmanship. “I wanted to create homes, not just places to live,” says Mr. Barr.

In the 50 years since Hurricane Donna, Mr. Barr has stayed true to his mission. And, he’s imparted this to his two sons, both of whom share their father’s commitment to quality and integrity. Their company, Construction Diversified has since expanded to all types of construction for residential and commercial projects—along with constructing projects for state and federal agencies. But, it’s building places people can call home that still matters most to them. For five decades, we have built over 1,000 new homes and repaired over 10,000. To this day, Construction Diversified’s first priority is to rebuild communities and lives impacted by nature’s fury.
