ABOUT US

GULFRAY – an international corporation based in Dammam, Saudi Arabia. Our business ties stretch from the Middle East to Africa, the Indian Sub-Continent and Latin America.

We supply and trade in general commodities that include motor lubricants, fertilizers, chemicals, and building materials. We are strategically positioned in a region renowned for its production of those products, and are connected to its most prominent producers. As such, we have an established network of reliable suppliers to replenish the continued demand of our clients. Our reputation relies upon our expertise in engineering, supply chain management and marketing.

Our superior products sail from the shores of the **Gulf** carrying our brand to our clients across the globe. Every batch carrying the name of "**GULFRAY**" is produced to the most stringent international specifications.

Every corporate direction is taken to jointly serve our three stakeholders: our clients, our investors, and the environment. We built our company with national values and international standards. We are GULFRAY.

OUR PHILOSOPHY

Our Vision:

To be recognized as a world leading supplier of chemicals and petrochemicals; to be trusted by our clients as the most reliable source for our lines of products; and to take a leading part in diversifying the local economy of Saudi Arabia.

Our Mission:

- Provide high quality products at unmatched prices
- Meet our clients' requirements
- Serve our clients' needs with professionalism and respect
- Establish a robust supply chain network
- Market our products across the globe
- Support the creativity and development of our employees
- Maximize our shareholders' profit

MOTOR LUBRICANTS

Our oils are flawlessly produced to provide safety, reliability and protection for all driving, marine and industrial applications. They are produced from superior base oils together with specially engineered additive systems. Their chemistry permits superior pumpability and lubrication to all moving parts during cold start up. At high operating temperatures, they maintain their lubricity and thermal stability to provide a highly efficient lubricating film for engine parts, and prevent sludge formation and oxidative thickening. As such, our oils are formulated to guarantee the following advantages:

- High thermal and high oxidation stability thereby minimizing oil thickening.
- Protection against wear to prolong the engine life.
- Inhibition properties against rust, corrosion & varnish formations.
- Excellent prevention of piston deposits and sludge formation.
- Sufficient detergency and dispersancy to keep the engine clean.
- Shear stable Viscosity Index to ensure consistent performance during summer and winter.

Based on our clients' needs, those lubricants can be chemically formulated to serve a diverse range of applications. This includes cars, trucks, ships, industrial rotating equipment, etc. They can be produced from virgin, recycled or mixed base oils. They are further enhanced by additive systems to conform with various API and SAE service categories. This makes them suited for a wide range of duties and extreme temperatures.

BASIC AND SPECIALITY CHEMICALS

We supply our clients with a range of basic and specialty chemicals that are produced to a high standard to serve their needs. Those include:

Automotive Fluids:

We provide a range of antifreeze and radiator coolants based on different chemistries. They are specifically designed to prolong the life of your engine. This is accomplished by preventing rust and corrosion in the radiator, engine and the vehicle's heater.

Paints:

Our company supplies a wide variety of paints. This includes water based paints, oil based paints, interior/exterior texture, polyurethanes, epoxies road marking, auto paints, wood varnishes, printing ink and aerosol products. Our products conform to the management system standard ISO 9001.

Construction Chemicals:

We supply a range of specialty construction chemicals and products specifically engineered for the concrete industry. Our product line includes concrete admixtures, sealants, adhesives, corrosion inhibitors, specialty mortars, epoxy resins, structural strengthening systems, grouts, anchoring adhesives, overlays, flooring systems and protective coating systems.

BASIC AND SPECIALITY CHEMICALS

Sulfuric Acid:

We deliver high quality sulfuric acid to meet demanding quality standards, while adhering to strict environment protection and safety regulations. Deliveries from the plants reach our clients in diverse fields of activity ranging from petroleum refining to potable water treatment plants. Sulfuric acid is produced in various dilution grades to serve our client needs. This ranges from highly concentrated acid to Glover, fertilizer and battery acids.

Cleaning Products:

We supply high performance liquid detergents for cleaning and general maintenance applications. The product range services Industrial and Janitorial applications as well as domestic household requirements.

FERTILIZERS AND AGROCHEMICALS

Our fertilizers and agrochemicals are engineered to nourish and protect your crops throughout their entire life cycle. The fertilizers complement your soil with much needed nutrients to stimulate plant growth during critical growth stages. Conversely, our agrochemicals protect your farms from all harmful pests. The agrochemicals include a wide range of fungicides, herbicides and insecticides. Our supply of fertilizers includes the following products which are specially formulated to serve your specific plantation needs.

Nitrogen:

- Ammonium Sulphate
- Ammonium Nitrate
- Calcium Ammonium Nitrate
- Urea

Phosphate:

- Ammonium Sulphate
- Ammonium Nitrate
- Calcium Ammonium
- Nitrate
- Urea

Potash:

- Muriate of Potash (MOP) – KCL
- Sulphate of Potash (SOP)

NPK:

- NPK Compound Fertilizers

BOARD OF DIRECTORS

Our diverse, multi-disciplined board of directors is the driving force behind the success of GULFRAY. Their expertise ranges from trading to corporate banking, engineering to supply chain management, and construction to international markets. They set the direction of GULFRAY and steer it through challenges and competition.

Dr. Riyadh A. Al-Mustafa

Dr. Riyadh is the Chairman of GULFRAY. He is also the Chairman of Dar Al-Mustafa Group and Board Director of several companies in Gulf region. Dr. Riyadh's professional highlights include obtaining the American Society of Civil Engineers' T. Y. Lin Award for 1989, as well as the Appreciation Certificate from HH Prince Mohammed Bin Fahd, Governor of the Eastern Province. Dr. Riyadh earned his PhD in Civil Engineering from University of Texas in USA.

Alawi A. Al-Khabbaz

Mr. Alawi has been appointed as a non-executive Board Director of GULFRAY. Mr. Alawi is a shareholder and Financial Director of Al Manara Electric Company, an agent for international companies in Middle East such as Panasonic. He has extensive experience in the trading, banking, manufacturing and contracting sectors across the GCC. Mr. Alawi holds a bachelor degree in Commerce & Political Science from King Saud University in Saudi Arabia.

Abdullah H. Al-Ghazal

As one of the co-founders of GULFRAY, Abdullah has played a crucial role at the success and development of the company. His strategy was to establish a company with national values and international standards. His prior experience was in the oil and gas sector. This was a key factor in developing his knowledge of the international oil market. Abdullah received his bachelor degree in Chemical Engineering from University of Manchester in the United Kingdom.

Ali R. Al-Mustafa

As a co-founder of GULFRAY, Ali has been leading the development and implementation of the corporation's strategic plans. He oversees the day-to-day operations of the business. Ali is the driving force behind GULFRAY's robust supply and marketing strategies. Beside GULFRAY, Ali's responsibilities extend to being the Deputy Manager of Dar Al-Mustafa, a family-owned group. He is a Virginia Tech graduate with a bachelor's degree in Chemical Engineering.

Wesam S. Al-Mustafa

With his corporate banking experience, Wesam is serving as the company's Financial Advisor. Having worked for three Saudi banks, he specializes in financial risk management. His expertise is engaged when venturing into new territories or expanding to new business lines. Wesam holds a bachelor degree in Information and Computer Science from King Fahad University of Petroleum and Minerals in Kingdom of Saudi Arabia.
