

## QUALITY ASSURANCE

*Without quality, cost and delivery are useless.*

IT has a culture of pride in our workmanship verified via incoming, in-process, and final inspections. Our quality management system was built upon the tried and true MIL-I-45208a & MIL-C-45662a inspection and calibration systems. We strive to produce at the highest efficiency while our clients rest assured accurate and consistent components are delivered every time.

## ASSEMBLED ASSETS

Component manufacturing, engineering and design services, automated fixtures/jigs, and assembly have been our focus for years. These in conjunction can help substantially lower your current assembly & QA overhead.

⇒ Ask us about our experience in providing inspected and assembled assets complete from start to finish.

**INTERNATIONAL TOOL**

# Let our manufacturing expertise work for your business.

QUALITY DRIVEN SOLUTIONS EVERY STEP OF THE WAY.

Ask us about our free Design for Manufacturing [DFM] services that can help you lower your bottom line by reducing costly scrap and rework.

## DIVERSE EXPERIENCE

- CNC MACHINING.
- POWDERED METALLURGY.
- COMPRESSION MOLDING.
- TOOL AND DIE.
- SHEET METAL FABRICATION.
- FIXTURES | JIGS | AUTOMATION.
- ASSEMBLY.

## flexible solutions for your manufacturing needs

### PRECISION MACHINING

With the skilled manual machining generation dwindling in numbers, quality issues have moved the 'Q' word to the top of every manufacturers list these days. IT has developed a manual-CNC training program to ensure our years of experience aren't lost.

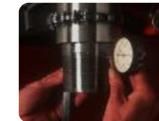

### QUICK TURNAROUND

*[Engineering]* We've been there before: Design, approvals, procurement and the next thing you know, it's been 6-8 weeks (if you're lucky enough to have one iteration). Combat snail-paced product development with our expedited DFM & delivery services.

### MEDICAL DEVICES

From stainless steel, to PTFE (Teflon®), Delrin, and composite components; IT has been serving the medical manufacturer's community for over 20 years.

### OIL & GAS

Inconel, Stainless, Aluminum, and custom-blended powdered metals have made up the bulk of our oil and gas experience. With plenty of machining capacity, IT is able to produce from a fraction of an inch to feet.

### AEROSPACE | DEFENSE

Titanium, Magnesium, exotic materials, plastic resins, and composites all are within the broad range of experience in Aero/Defense applications since the founding of IT.

### ELECTRONICS

Fixtures, jigs, dies, tooling, and automation have all been designed and fabricated to aid in the manufacture of today's electronics. In addition, IT offers turn-key custom machines.

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?
