## *New Oil or Use Your Existing Oil*

Phoenix Hydraulic Engineering will come to your site and filter your oil from your tanks. We will clean your tanks and put your oil back in the tanks. We will tell you right away if your oil can't be filtered and needs replacing. If your oil has lost its viscosity or is simply burnt, we can offer you oil at an unbelievably low price saving you time and money!!!!

## Hydraulic Pumps including Hydrostatics, Motors, Cylinders and Valve Repairs

### About Us

Phoenix Hydraulic Engineering

Florence, SC

Specializing in the repair of ALL  
Industrial Hydraulic Components

Cylinders  
Pumps  
Motors  
Valves  
Actuators

Phoenix Hydraulic Engineering  
will keep you up and running. Our  
technicians can repair and service  
all industrial hydraulic systems and  
machinery.

### Our Specialty

We specialize in the design and  
repair of hydraulic pumps  
(including hydrostatic), motors,  
and cylinders. Everything from  
small pneumatics to large press  
hydraulics, to gear boxes, to power  
units. We have the experience and  
knowledge to exceed your  
expectations.

### Hydraulic/Pneumatic Repair Services

After teardown, we assess and  
advise you of any parts that we feel  
will increase efficiency,  
performance and/or be more cost  
effective. We test all of our  
repaired parts at maximum  
recommended "overload" pressure.

Phoenix Hydraulic Engineering  
can evaluate, repair, and supply  
any type of hydraulic and  
pneumatic cylinders. Our fully  
experienced technicians will be  
able to repair, rebuild and test your  
unit.

**We are committed to the quality  
you need and the excellence that  
you deserve.**
