

Fresh Gear

RAPID SANITIZING SYSTEM

Reduce the risk of cross-contamination with this valuable health and safety tool. Designed to ensure that the PPE intended to protect, does not itself become a source of harm.

Fresh Gear Ready in Minutes!

- Kill up to 99.99% of pathogens, including MSRA, HIV and Hepatitis via chemical-free, dry ozone process.
- High volume ozone flow enables turnout gear to be **dried and decontaminated simultaneously!**
- Sanitize one full set of turnout gear per cycle (jacket, pants, helmet, boots, gloves), in as little as 10 minutes.

Operating Costs

- Only a few cents of 110v electricity to operate, resulting in the lowest costs of any sanitizing system.
- No need to purchase, store and mix chemicals and detergents. Fresh Gear does not use consumables.
- **Extend the life of your gear. Keep it clean and dry.**

Safe and Easy to Use

- ✓ NFPA 1851 compliant, chemical-free process means no flammable residue on your turnout gear.
- ✓ Your gear is always dry and available. It doesn't leave the station or take hours to dry out after washing.
- ✓ No pipes, drains or vents required.
- ✓ No heat, no tumbling or agitation. No wear and tear!
- ✓ A true "green machine".

\$16,950 Purchase Price

- ✓ Financing available
- ✓ 30-day satisfaction guarantee
- ✓ 3-year FULL warranty (parts and labor)
- ✓ 10-year warranty on steel cabinet

Built in North America and ready to provide many years of bacteria-busting performance!
