

We Need a set of customized Server / Virtual Server and Desktop graphics to use on Website and in Presentations.

I have included a set of graphics from a Vendor of mine that I am free to use and modify that may be a good starting point for you. You do not need to use them, just thought they may help.

I would like to incorporate the “X” or something from our logo on the server and desktop icons. And also put different screens on the monitor in any desktop graphic.

These will be scaled up and down so they need to be in a high enough resolution to look good big.

The icons will need to be able to be combined into a Physical Server containing multiple Virtual Servers and Desktops like the graphic in the lower right of the next page.

Will need PSD,PNG and EPS files , all graphics will need transparent backgrounds

Thank You

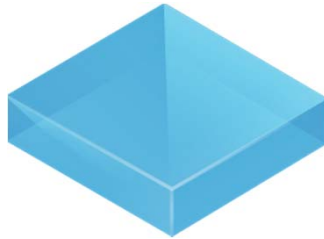

Graphics needed on next page

Icon #1
(Server)

Icon #2
(Software
layer)

Should be able to fit
on top of server icon

Icon #3
(Server)
Front View

Icon #4
(Storage)

Icon #5
(Rack)

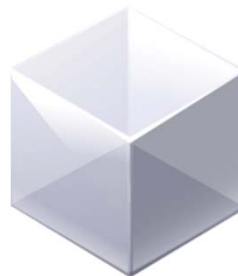

Icon #6
(Desktop)

Icon #7
(Virtual
Desktop)

Icon #8
(Virtual
Server)
Needs to have the
server icon in it

Icons should be able to be
combined into this kind of
representation
