

All:

As an addendum to the brief:

We are looking for a 1 page 8.5" x 11" ad / marketing sheet to give a brief overview of our company. I have included in the uploaded files a 2 page sheet that did this, but we want to freshen it up, and condense to 1 page.

The 1 page sheet should include our logo, address, contact information etc, and website. In addition, we would like our intended audience, who will be professional business people wanting us to do their construction, to get a flavor of the type of projects we do, and who we are. I have uploaded a bunch of pictures that could be used, but certainly not all of them. I will leave it to the designer's discretion as to how many and what layout. I would think we might want a couple that highlight what appears to be the most interesting projects, however maybe a single nice picture would work to – the world is your oyster.

Please check our website which was redone this year www.wackgc.com for more information on our company.

For the text, it could include portions from our current marketing sheet, our website, or little text at all if you feel the pictures speak for themselves.

Thanks,
