

DESIGN BRIEF

Who are We?

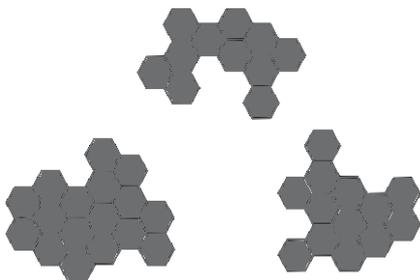

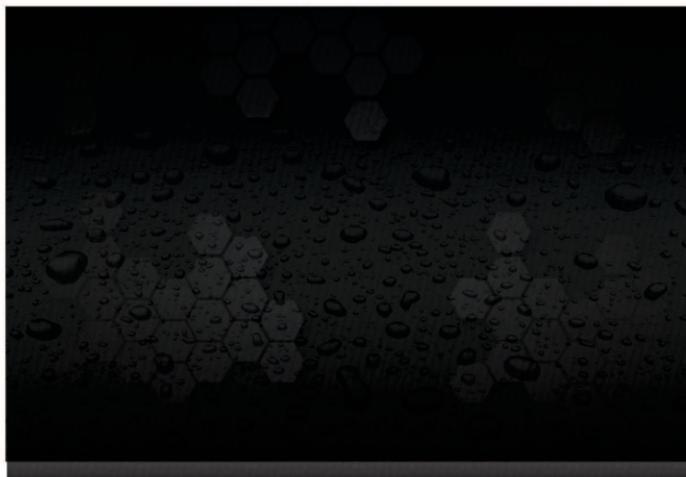

We are a company providing supplements and sports equipment.

Logo:

This is our brand logo, that goes on all our products.

Fifth Element:

In many of our materials we use a pentagon background. Pentagon is also visible in our logo. If possible, try to incorporate elements of pentagons in your design.

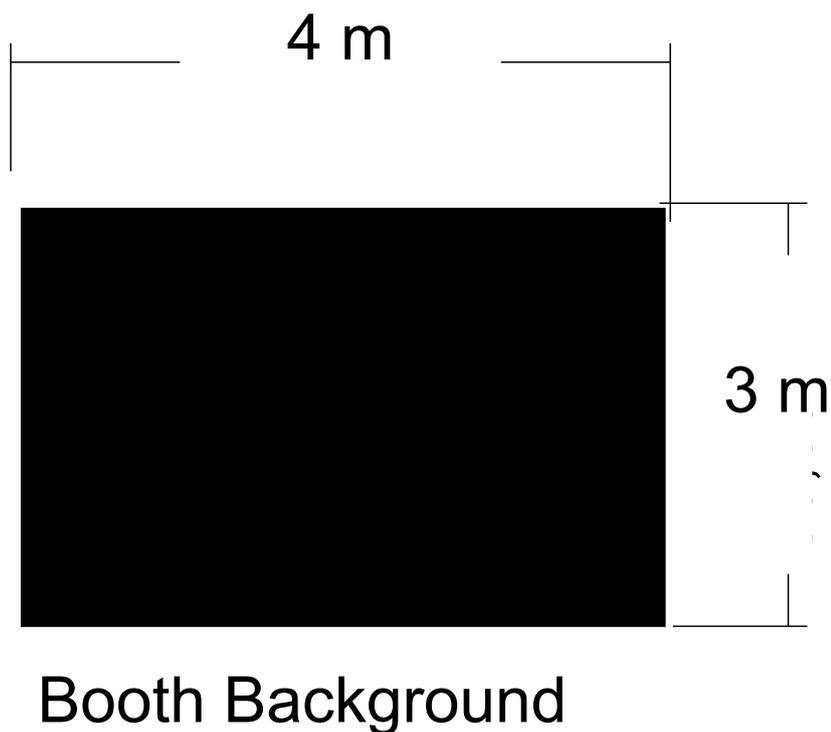

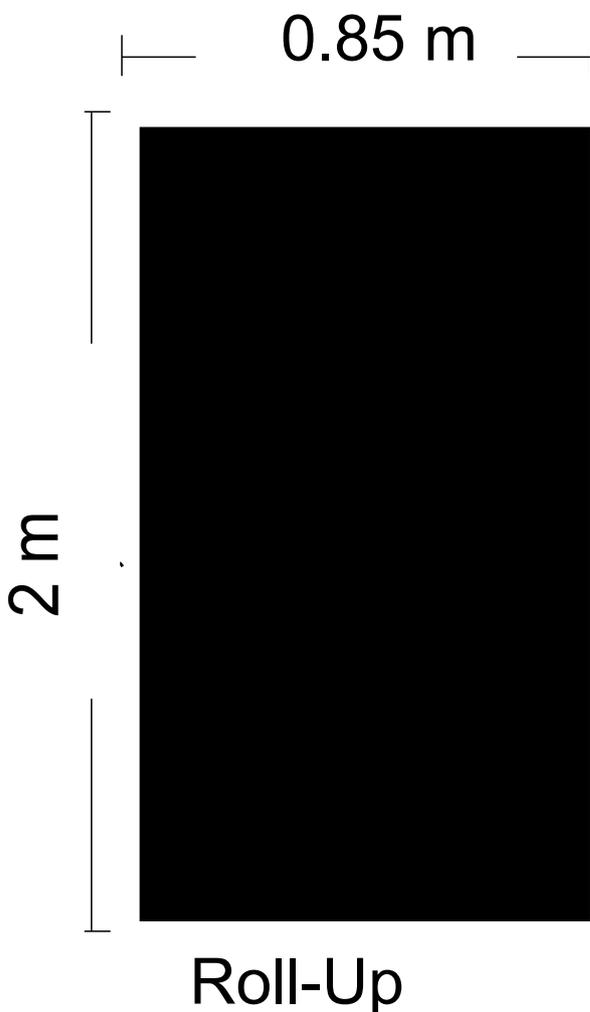

You can also try incorporating the pictures of athletes.

Purpose of Design Project:

We are planning to have a promotional booth in the fitness show. Our main purpose is to promote 4 products that our company produces. So we need effective visual materials with style.

What is Needed?

- 3 Roll-Ups for each product: *Whey Dynamic; Giant; Liquid Amino* that we want to promote.
- Booth background promoting product *TRITECH*

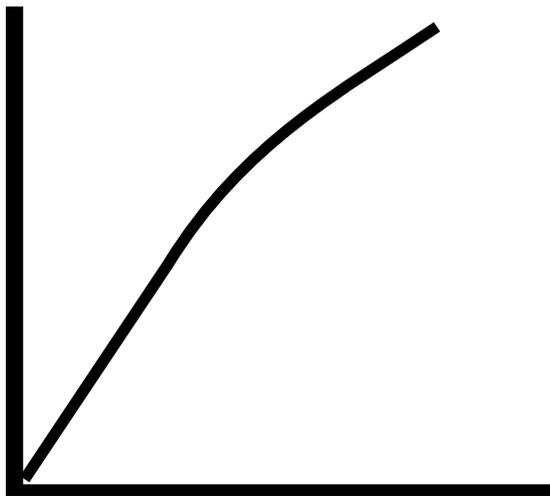

Roll-Up 1

Whey Dynamic

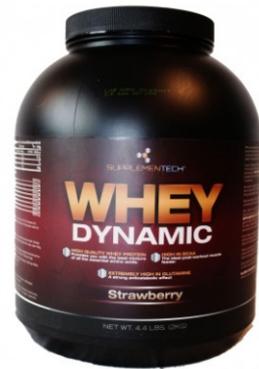

BUILD SIZE AND STRENGTH FASTER

Up to 180% more gains in lean muscle mass.

GREAT Taste!

54 g protein a serving!

Roll-Up 2

Giant

GET BIG NOW

MASSIVE MUSCLE GROWTH

47 g of protein a serving
Best-tasting gainer
You ever tasted!

Roll-Up 3

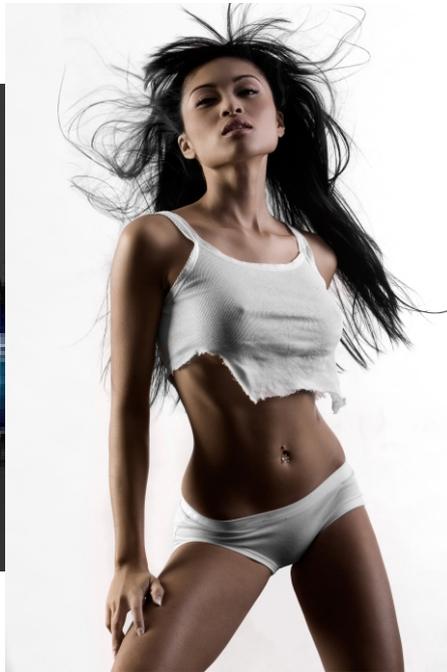

Liquid Amino

The strongest Muscle
protector during workouts

Booth Background:

For the booth background we would like to have something like these pictures. We have the labels of product, so you should draw a jar.

Supplementech TRITECH, a revolutionary designed protein matrix replacement source! Contains whey, as it is used, but mixture of these superior protein sources, which together give a absolute high biological value.

Whey protein isolates the best quality protein source for muscle, with high ability to supply amino acids for muscular growth, development and repair functions.

Egg protein isolates are egg protein products with the best mixture of all essential amino acids for supporting maximal nitrogen build-up for your body. Eggs are high in other proteins, which you need for the muscle.

Calcium caseinate isolates the best of high-quality milk protein refined by scientific method using fresh fat with no raw material to produce pure high quality of calcium as well as essential amino acids. Calcium caseinate is perhaps most well-known for its ability to be digested slowly, by staying in muscle environment of the muscle and releasing amino acids slowly, which is best for those who have longer than other protein sources, what makes it your best choice to be taken in the morning and before bed time.
