

OPERA reports

Unleash the power of your data

Organic Performance Engineering Reports & Analysis

A portfolio of ready to use reports designed to complement your existing field data visualization and investigation solution.

Available reports:

Key Performance Indicator
Investigation & troubleshooting
RF Scanner
Benchmarking
In-building
Site commissioning

Supporting UMTS & LTE

OPERA stands for “Organic Performance Engineering Reports & Analysis”.

The OPERA portfolio has been developed to support a range of the most popular data collection formats, and is compatible with major data visualization and investigation tools, including Actix, TEMS Investigation and NQDI. Simply install the OPERA engine onto your existing visualization and investigation platform to unleash the full power of your data.

The content of each OPERA report has been selected based upon SIRIQ’s extensive experience in developing customized reports for network operators around the world.

Simple, Fast & Productive

Valuable

Add powerful reporting capabilities to your preferred data visualization and investigation solution. The OPERA portfolio complements and enhances your existing tools.

Productive

Improve the productivity of your teams by easily and efficiently extracting the full value contained in your valuable drive test and walk test data.

Fast

Quickly understand your network and instantly gain access to customized troubleshooting capabilities, facilitating rapid investigation of customer tickets, dropped calls, access failures, low throughput, etc.

Portable

Share your reports in MS Excel or Adobe pdf format, with members of your organization, or with your customers.

Multi-usage

Couple the OPERA reports with the latest handheld data collection solutions running on smartphones or tablets, giving all groups within your organization access to evolved analysis and troubleshooting capabilities. Field technicians, site integration teams, customer support specialists, technical sales teams, and in-building SME's are all groups who can benefit from our solutions.

Turnkey reporting services

If your organization doesn't currently have a data visualization and investigation solution, then send us your data, and we will post-process it for you, providing you with the reports you need.
