

RDP

SOLUTIONS, LLC

Experts in Mission Critical Facility Solutions

Discover

Our experts help evaluate your existing state, define strategic direction and improve efficiencies in facilities operations.

Define

Our solutions help you attain energy savings that more than pay for our services through the unwavering attention to detail and capabilities of our mission critical facility professionals.

Design

We leverage the existing systems within your facility to bring them all to a common intelligence platform. This removes those "barriers and walls" between realty services and technology / operations groups. Even if you have diverse vendor systems, in multiple facilities; we can centralize your footprint.

Deploy

We complete your journey with you implementing the central facilities orchestration needed for the future autonomies of your facility. You can now be assured that all your decisions are made on the most accurate real time data available.

Mission Critical Facility Solutions

We provide the following services:

Mission Critical Facility Power, Cooling and Controls Transformation Roadmaps.

Custom Monitoring & Graphics

Centralized Dashboard / Control Console Creation

Information technology analysis, strategy, and design

Data Center / Facility Survey

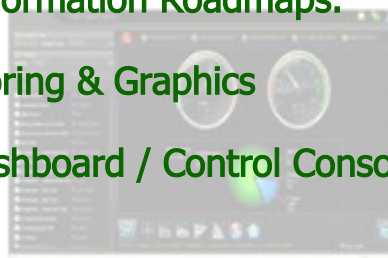

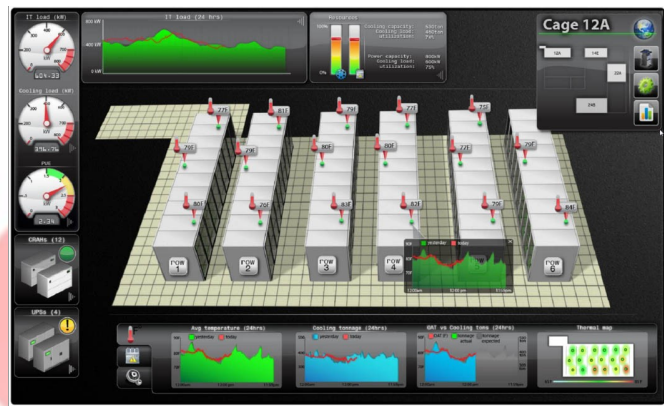

Consultation - Trusted Advisor / Customer Advocate

On-site facilities systems maintenance and support

Remote monitoring and support

Infrastructure cabling, wiring and electrical work

DCIM implementation and deployment
