Compaction ...  
... it's in our blood

## Conplant continues to grow...

For over four decades Conplant has built its reputation on quality customer service, specialising in a broad range of compaction equipment and associated services.

In 2005, Conplant expanded and realigned itself to better service its customers through the introduction of Ammann new equipment sales. This move together with the company's entrenched customer service culture is reflected in Conplant's new mission "To provide **Total Compaction Solutions** tailored to suit our customer needs whilst exceeding industry standards for safety, service, products and value."

### Who is Ammann?

Founded 135 years ago, Swiss based Ammann is a premium manufacturer of compaction equipment and the world leader for asphalt plants.

In recent times Ammann have increased their focus on compaction equipment through their acquisition of Stavostroj (STA) in 2005 and Rammax in 1995. Ammann now manufacture well over 10,000 units per year for the world market from manufacturing facilities in Switzerland, Germany and the Czech Republic. They also manufacture rollers for some of the best known brand names on the world market.

Ammann's motto "Productivity Partnership for a Lifetime" is a true reflection of their long term approach to business relationships and product support which aligns perfectly with Conplant's values.

### How can Conplant help my business?

Purchasing compaction equipment is not always the best option for many businesses and there are numerous factors that influence ownership decisions which vary considerably from business to business.

Some choose to own highly utilised 'core fleet' and hire additional machines during peak periods as well as specialised units for difficult or infrequent applications. Others view compaction equipment as non-core business and choose hire for all their requirements.

Being a **Total Compaction Solutions** company means we can offer you advice on what options best meet your individual business needs. Conplant can help you analyse your business's compaction equipment requirements and tailor cost effective solutions from a comprehensive range of products, services and financial options.

# Hire Compaction Equipment

Having the most diverse range of compaction equipment available for hire in Australia, Conplant is better equipped to supply you what you need, when you need it.

Greater choice means the most suitable compaction equipment can be supplied for your application - the correct compaction equipment will deliver the best results.

### Our range

Trench Rollers	1,480 kg
Tandem Smoothdrum Rollers	1,170 – 18,150 kg
Tandem Padfoot Rollers	4,800 kg
Single Drum Smoothdrum Rollers	1,395 – 26,000 kg
Single Drum Padfoot Rollers	1,395 – 27,000 kg
Deadweight Rollers	12,000 – 15,200 kg
Pneumatic-Tyred Rollers	1,550 – 40,000 kg
Combination Rollers	3,600 – 7,800 kg
Soil Compactors	20,880 – 32,000 kg
Towed Smoothdrum Rollers	16,000 kg
Waste Compactors	31,800 kg

# New Sales Compaction Equipment

The Ammann name may be new to some, but the product is well proven in Australia. Ammann's Pneumatic Tyred Roller and ASC single drum range was distributed here for many years under other well known brands.

### Rammers and Plates

Ammann has a wide range including large reversible plates

### Trench Rollers

Available with infra-red remote control

### Tandem and Combination Rollers

1,450-12,500 kg

### Pneumatic Tyred Rollers

3,000-24,000 kg

### Single Drum Rollers

1,800-24,000 kg

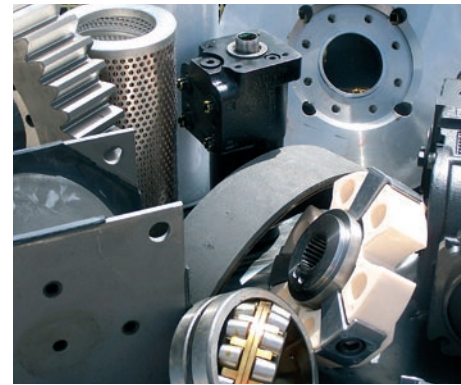

ACE automatically measures soil stiffness and adjusts amplitude, frequency and roller speed to suit the material condition and compaction requirements.

- ACE benefits include:
- Uniform compaction
  - High quality surface finishing
  - Detection of unstable sub-strata
  - Reduced risk of over-compaction due to automatic vibration cut-off
  - Higher productivity through reduced numbers of passes – Reduction of machine (fuel and maintenance) and labour cost

# Total Compaction Solutions

Our mission... To provide **Total Compaction Solutions** tailored to suit our customer needs whilst setting industry standards for service, products and value.

## Used Equipment

We stock used compaction equipment to suit most requirements, from late model/low hour units to older and more inexpensive options.

We can also provide additional services such as reconditioning, custom modifications and painting to suit your needs.

For current listings and further details please visit our website [www.conplant.com.au](http://www.conplant.com.au)

## Spare Parts

We hold a comprehensive range of genuine spare parts for Ammann, Rammax and STA equipment. We also stock a range of remanufactured components that can be a cost effective means of reducing downtime.

## Service

Our service team is highly qualified and experienced - they know compaction equipment! We have the capacity and flexibility to carry out minor service work to major rebuilds and repairs.

Our core service competencies include:

- Field service
- Insurance work
- Machine valuations
- Maintenance
- Modifications and upgrades
- Refurbishment
- Repairs
- Warranty

## Training

We can provide tailored training, including:

- Compaction applications
- Roller Operator
- Service (workshop)

## Technical Assistance

Our qualified team is here to assist you.

We offer technical assistance for:

- Compaction applications
- Equipment selection
- Mechanical and engineering (including troubleshooting)

## Financial solutions

We provide a number of financial solutions designed to meet your operational and financial objectives. They include:

- Commercial Hire Purchase
- Finance Lease
- Hire
- Operating Lease (with or without service package)

## Ammann Asphalt Plants World No. 1

Ammann is the world leader for asphalt plants with over 2800 units operating throughout the world.
