

Interpro Forest Products

Corporate Headquarters

Global Exporter of Lumber, Sawnwood, and Panel Products

Vancouver, British Columbia, Canada

Interpro Forest Products is the corporate headquarters and the flagship company of the Interpro Group. Along with managing the activities and operations across all of Interpro's subsidiaries and satellite offices, we are the organization's chief exporter of lumber, sawn wood, and panel products.

Interpro Forest Products actively exports over 200 million board feet (equivalent to 470,000 m³) of finished lumber, sawn wood, and panel products per year into more than 15 countries. We have joined regional cooperative contract partnerships in the Subcontinent, the Far East, and South East Asia. The location of the headquarters in beautiful British Columbia is ideal for any forest products company since some of the world's most technologically advanced and efficient sawmills are located in Canada and the United States. Over the years, we have developed very strong relationships with these manufacturers. Based on strong commitments and proactive support, Interpro Forest Products has also developed supply lines from more than 10 supply hubs across the world from South America to Eastern Europe. Having satellite offices in South Korea, the United States, the Philippines, and the Kingdom of Saudi Arabia and a regional headquarters located in Dubai, U.A.E., Interpro Forest Products is truly a global exporter of forest products.

With a renowned reputation in the industry and a strong track record, Interpro Forest Products has provided unparalleled service to its valued customers and has offered competitively priced products that satisfy the distinctive requirements of any geographic market. Interpro Forest Products deals in:

- All major export sizes, full sawn, and standard North American dimensions and lengths.
- S4S and rough lumber/sawnwood.
- Kiln dried (KD), heat treated (HT), and shipping dry or green wood.
- Species grown in North and South America, Eastern Europe, Russia, and Far East Asia.

The product portfolio is comprised of softwood and hardwood boards, dimensional lumber, timbers, studs, joists and planks, and panel products such as medium density fiberboard (MDF), oriented strand board (OSB) and plywood.
