

# KURETECH

BUILT BY INTELLIGENCE

Kuretech is a Media Center Integrator that utilizes three elements of modern day living: entertainment, functionality, information. We incorporate these elements into our line of products and services. Our array of products and services are designed to enrich and enhance the Digital Lifestyle experience. Our media servers and extenders are designed with aesthetic appeal, scalability, and performance in mind.

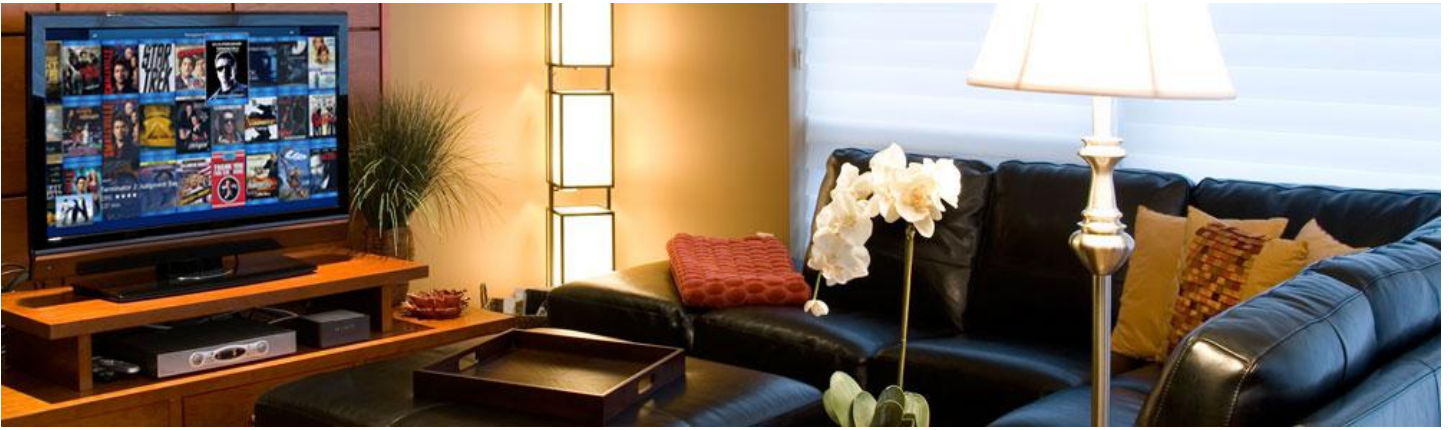

- Store Music CDs, DVDs, Blu Rays, and Picture Albums in digital format on a Media Server.
- Watch, pause, rewind, and record digital TV and Internet TV.
- 7.1 Surround Sound and 1080 HD video.

Connect your iPad with a Media Server, to easily browse and decide on a movie to watch. Then start it directly without having to pick up a remote control.

# MEDIA EXTENDERS

NAVIGATOR

PANAMAX

Media Extenders access content stored on Media Servers via wired network connections. Media Servers can also stream live and recorded Cable TV programming to Media Extenders. We currently offer three Media Extenders, Bridge and Panamax. The Navigator is essentially a 22" HDTV with a touch screen interface, making it ideal for locations in the home where a digital display is not present. The Panamax and Bridge's low profile design allows for ease of installation on the rear of Vesa compatible flat panel displays or can be mounted behind a wall mounted flat panel display.

# MEDIA CENTER

## MOVIE COLLECTION SOFTWARE

You can experience your entire movie collection, and browse through and play your movies, browse cast, play trailers and much more by using a remote control within your living room or home theatre.

## INTERNET TV

If you watch Internet TV in your browser, you're used to surfing between sites. Searching for what you want to watch. Struggling with different playback experiences. Now, you can stay put and Internet TV will come to you. Watch your favorite Internet TV shows, movies, and videos – all in one place!

## LIVE TV

Media Center gives you the ability to pause, record, and rewind live TV. With the season pass feature you are able to record a full season of your favorite TV program.

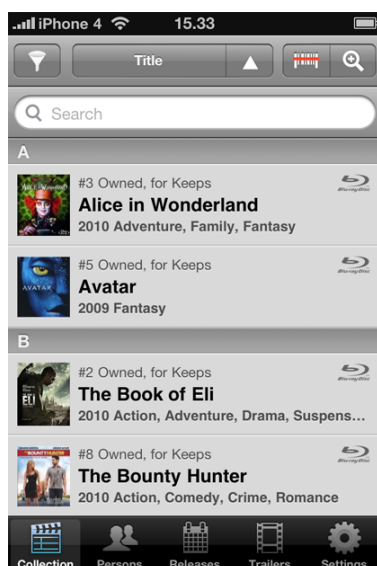

## MUSIC, VIDEO, & PICTURE LIBRARY

Get rid of unsightly CD racks from your living room by ripping your entire music collection onto a Media Server. Browse your entire music collection by genre, album, artist, and year by using a remote control. Picture Library makes it easy to store all of your digital photos in a central location and create digital photo albums. Watch your digital photos come to life on your large flat panel display. Convert priceless memories stored on VHS tapes to digital format in addition to archiving a wide array of other digital video formats.

# MOVIE COLLECTION SOFTWARE

## MY MOVIES FOR IPHONE

There are two versions of the application, free light version with limited feature set and paid pro version. The free light version has a maximum of 100 titles limitation. The paid pro version has a full feature set and no limitation on the amount of titles. Some of the feature sets included in the paid pro version are: Camera Barcode Scanning, Movie Trailers, Loan Management, Detailed Filtering.

### Camera Barcode Scanning

By using the camera on your iPhone scan the barcode and quickly see all the details of the disc release, and watch a movie theater trailer directly.

### Movie Trailers

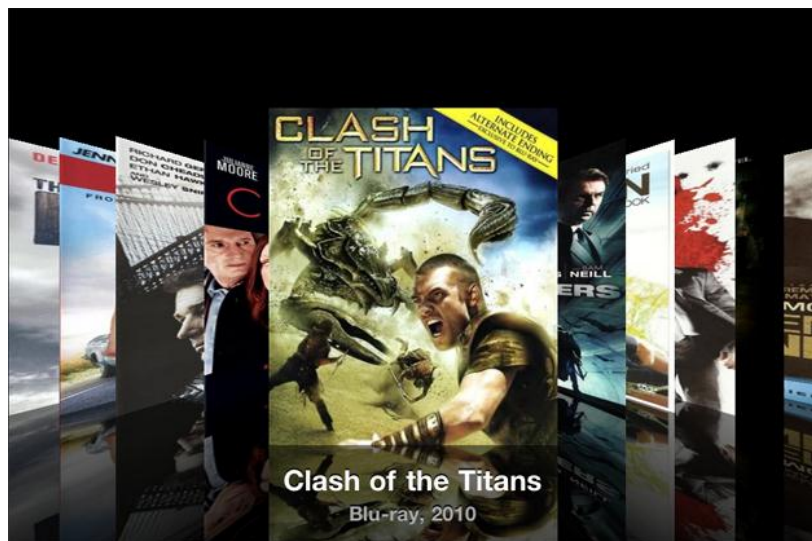

If you are unsure which movie to watch, rent or purchase, you can at any time see a movie trailer for the titles in your collection, or for titles you scan or lookup on our data service. The application also contains a "Trailers" section, allowing you to see trailers of movies currently or coming in a cinema near you.

### Loan Management

Have you ever tried loaning a movie to a friend, and then after a while forget all about it, until the day you can't remember where it is? You can now instead click "Loan to" in the application, and select who you are loaning a movie to, and when the person is expected to return it - that way, using the "Loan" filter you can always keep track of who has which titles.

### Detailed Filtering

Having a large movie collection, being able to filter your titles is essential - using the filtering options, you are sure to be able to find what you are looking for. You can filter on type (DVD, Blu-ray, HD DVD), genre, group (owned, wished ...), watched, parental rating levels, production years, personal categories, online status\* and loaned status.

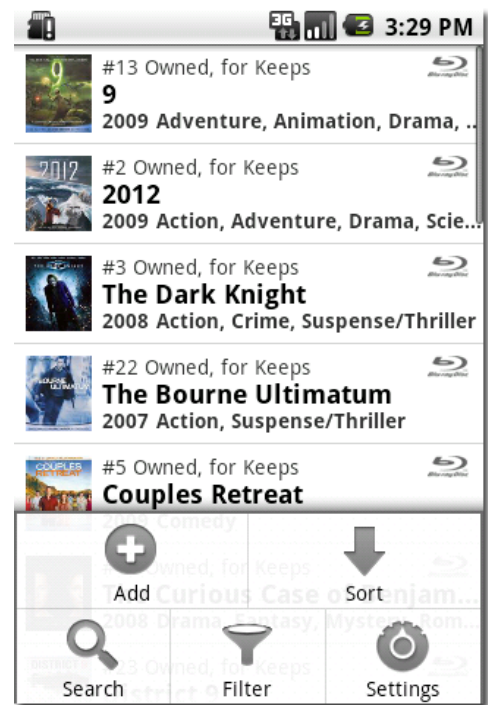

# MY MOVIES FOR ANDROID

You can keep track of movies you own, previously have owned, rented or movies you wish to purchase. Never again will you have to purchase or rent a movie twice.

## Features:

- Add titles by barcode or title search.
- Add titles to different groups (Owned, Wished, Rented ...).
- Sort titles by title, year or collection number.
- Filter titles by type, genre or group.
- Search your collection by title.
- View movie details, including synopsis and full cast list.
- View full screen front cover.
- Keep collection synchronized between different clients or phones.

# MYMOVIES FOR IPAD

My Movies for iPad is the fastest, easiest and most impressive way you have ever kept track of your movie collection. Using or high quality movie database of more than 300,000 titles on DVD and Blu-ray, you quickly get access to a large quantity of details of the titles in your movie collection, including movie trailers, high resolution covers and much, much more. You can use the application as a standalone product by adding titles by barcode, title searches or manual data entry. By using the application along with My Movies for iPhone Pro, you can use the camera on your phone to scan barcodes and synchronize the added titles on the iPad. Use the iPad to start playback of the titles in your movie collection on your Media Server. This allows you to use the iPad to easily browse and decide on a movie to watch, and then start it directly without having to pick up a remote control for the Media Center.

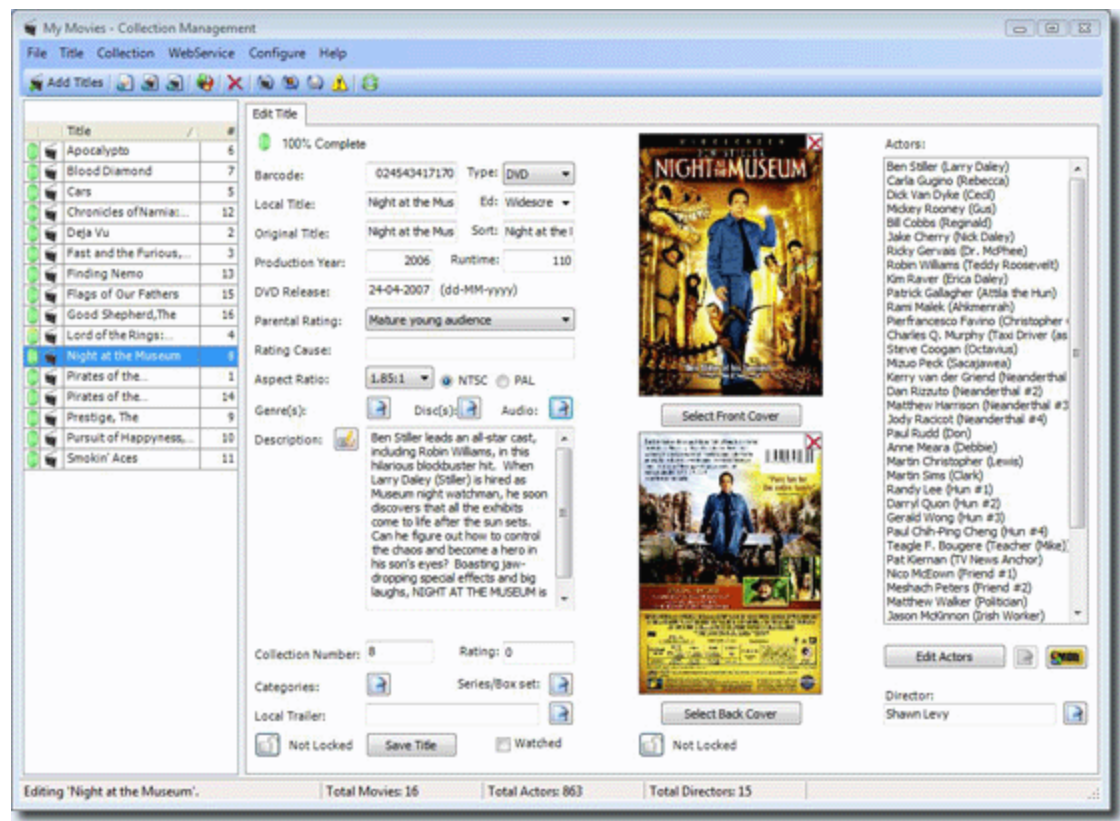

# MY MOVIES ONLINE COLLECTION

Allows you to synchronize your movie collection, with My Movies internet server. Giving friends and family members access to your movie collection. [Click here to view demo](#)

## COLLECTION MANAGEMENT

The My Movies Collection Management product lets you maintain and manage your entire movie collection, letting you add your movies with high-quality meta-data from our online service. You can either manage titles that you have stored on your computer, or home storage device, or you can manage titles you have on the shelf in your home, to bring you in control of which movies you have, including all the details about each movie.

# TUNERS

## INFINITV 4

The Ceton InfiniTV 4 is the world's first multi-tuner card for watching digital cable TV on a Media Server, including support for premium cable channels. It enables Media Servers to play or record up to four live channels of HDTV at once, and stream live HD channels or recordings to multiple HDTVs throughout the home, all from a single cable connection and a single CableCARD™. Replace your cable set-top boxes and their costly monthly rental fees and enjoy premium cable TV throughout the home, via a single Media Server. With the Ceton InfiniTV 4 your Media Server becomes a complete entertainment platform for all your media, including premium cable TV.

## MY CINEMA EHC3-150 DUAL HDTV TUNER

Provides a total solution for home theater entertainments, which is combination of FM analog receiver, analog TV receiver and digital TV receiver. You can watch analog TV and digital TV over the air (or digital TV through a standard coaxial cable) simultaneously. The greatest bonus is that you can also watch analog TV or digital TV and record another, or record two different channels at the same time.

# MEDIA STORAGE

Converting personal media to digital format can be a simple do it yourself project or we can do for you. Calculating how much digital storage you may need to store your expanding personal media collection is essential in choosing a Media Server. Media Servers range in storage capacity from 500GB to 18TB.

	500GB (0.5TB)	2TB (2000GB)
Music Albums	5,000	20,000
DVD	125	450
Blu Ray	20	80
Digital Pictures	10,000,000	40,000,000

The image shows a movie player interface for the film 'Inception'. The background is a still from the movie showing several men in suits walking down a city street. The interface includes a navigation bar with 'details', 'synopsis', 'cast + crew', and 'aud'. Below this, there are links for 'play' and 'trailer'. The movie title 'Inception' is displayed, along with the year '2010' and a five-star rating. The description reads: '12/7/2010, 148 min, Mystery, Suspense/Thriller, Science-Fiction, Action. Rated PG-13 for Sequences of Violence and Action Throughout. Located on storage path 'I:\Movies\Inception''. To the right, there are two movie posters: one for 'PG 13' and another for 'INCEPTION'. On the far right, there are controls for video format (AVI, xvid, SD), frame rate (23 FPS, 976), and aspect ratio (2.35 : 1).
