Splice width:	\pm 25 mm	Unroll direction:	8

UNROLL DIRECTION

R= Side with seal

Unroll direction 8

Rewinding in transversal shifted mode

IMPORTANT:

The products we deliver are sensitive to temperature.
Warehouse conditions: registered temperature always under 25°C and without exposure to direct sunlight. Light deviations or coincidences in printing are endured.
The products need to be used within a maximum period of 4 months counting from the production date. Expiry date is mentioned on the packaging label.
The performance of the product and its suitability for the customers' purpose depend on the particular conditions of use and materials being sleeved.
Therefore, a full evaluation of performance and safety-in-use prior to using our products in commercial applications is recommended.
The converters and the packing/filler have the legal responsibility to insure that the finished article is fit for their intended purpose(s).
Items not mentioned in the contract: our sales conditions are valid which can be consulted at anytime.
