BHEESTIE is easy to use and it is always thirsty.

#### DIRECTIONS:

1. Turn off your electronic item (if in protective case remove), dry off item and place in the silver bag with bead pouch (do not remove beads from clear pouch).
2. Seal bag tight.
3. To remove everyday moisture leave electronic item in bag overnight or until next use. If item has been soaked or submerged immediately remove battery, dry all visible water, and place in BHEESTIE bag® - leaving in for 24 - 72 hours.

**The bag should last up to a year if used for everyday moisture removal** and is kept sealed tight at all times. If it is used to save a wet cellphone, iPod®, etc. it may last a shorter time.

**ALWAYS KEEP BAG SEALED TIGHT OR BEADS WILL LOSE ADSORPTION ABILITY MUCH FASTER!**

There are a small amount of blue "indicator" beads in the bead pouch. When these turn gray it is time to replace BHEESTIE.

**NOTE:** BHEESTIE® can't save LCD screens or cell phones, etc., that have shorted out or are broken. Be sure not to turn on a wet cell phone - wait until it is completely dry.

If you follow the directions for BHEESTIE® we have a near 100% success rate.

Everyone with a cell phone, iPod, PDA, camera, etc. should have a BHEESTIE bag®.

BHEESTIE keeps personal electronics working better and potentially lasting longer. Can be used for daily maintenance or even to save a wet cellphone, iPod®, camera, etc. BHEESTIE can last up to a year depending on use.

Great for use after sports and activities: running, skiing, golfing, boating, travel, gym, walking, beach, biking, water sports or accidental soakings. BHEESTIE pulls the wet out of your electronics.
