

EZ-Xtend Boat Zipper

One Innovative Marine Zipper provides solutions to frustrating boat cover repair problems

Problem 1 – Your boat enclosure has shrunken and you are having trouble snapping and zipping your zippers.

Solution 2 – EZ-Xtend Boat Zipper acts as spacer zipper and lowers boat enclosure panels to snap easily again. It can also be zipped in between vertical zippers for side to side relief.

Problem 2 – Your boat zipper teeth have worn out just enough where the teeth won't stay locked together anymore and now your zipper teeth separate when you try to zip them.

Solution 2 – EZ-Xtend Boat Zipper unit comes to the rescue by providing fresh new teeth for zipping to that old zipper. With an extra bonus of some added space.

Problem 3 – EZ-Xtend Boat Zipper comes in handy as an emergency insertion zipper when you you break a couple of teeth on old zippers. Providing a quick temporary solution for securing your canvas.
