

## Salesfolder frontpage and back

We cut and insert this front / back into a plastic binder (se picture).

## Cardboard folder

Same design as above but i imagine we could write something about the company on the sleeves. You just insert *dolorum ipsum...* into the text area and we will replace text before print. See measurements below.

**Image measurements: 530 x 424 mm. or 6260 x 5004 pixels, resolution 300 dpi**

## The business card:

We have always used vertical business cards because we like this format. Print should only be on one side because we plan to print business cards on transparent cardboard or plastic. Card should include same information as on the old one below. We don't need the ApS (equal to LTD) in the company name.

## **Letterheads page 1 and 2**

We need new company letterheads. We would like both a page 1 with all address and company data included and a simplified page 2 without info.

Information included are:

The logo ie company name

Street address: Farimagssvej 36

Zipcode: DK-4700

City: Næstved

Phone: +45 70201537

Fax: +45 70201538

E-mail: info@sanva.dk

Website: www.sanva.dk

Company type: Anpartsselskab

CVR.: 30923456 (DK company registration number)

## **A4 1 page brochure Layout, page 1 and 2:**

We need a 1 page brochure format for short presentations of the services we offer. It is ok to use pictures. We will replace pictures with our own. With regards to text. Just insert Ipsum lorem or similar and we will insert our own text afterwards. We need a headline, a sub headline, enough space to write 350-400 words singespaced using, font size 10 tahoma. We will mostly use page 1 because we believe in short messages but we also need a page 2 for special purposes or as back side.

## **2 T-shirt designs:**

We need 2 different t-shirt designs. T-shirt will be printed on white and light grey shirts. One is the standard conservative type like the one borrowed from Raindesigns design for Caliberjet:

Design doesn't have to look like this design. Design is an example of the simplicity and style.

We also want something a little more modern and hip to be printed on white, grey, light blue and black. T-shirt design should use the theme "Det ny Sanva" (The new Sanva) both languages is acceptable. Design can use multiple colors and/or year numbers, and will be ordered via a print on demand service.

### **T-shirts continued:**

Something fresh with relation to water/nature and the fact that we are a cleaning service. Below is a an example of how modern and style we are looking for:

Again, design should not look like this. This is an example of how modern you are allowed to get. Use several colors, fonts etc. Something cool, funny and good looking.

### **Roll up banner:**

60 x 205 cm roll up banner. It is ok to use faces and pictures. If you need bullit points to add to banner just let us know.

### **General information:**

We will edit after receiving designs. All files should be layered, editable files, psd or AI format.

You have any questions please contact us via [mycroburst.com](http://mycroburst.com).

Best regards and good luck :-)

Jan Gottliebsen
