

ONLINE CONFERENCE POSTER SUBMISSION AND VIEWING

SHARE &gt; COLLABORATE &gt; DISCOVER

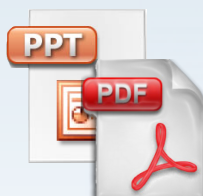

### System Configuration Options

- > Choose from variety of configurations including stand-alone, account-based, or abstract/manuscript-linked systems.
- > Import existing abstract/account information to pre-populate submission accounts.
- > Optional: "Invitation-only" submission collection.

### Collection Form Flexibility

- > Collect any desired information with each ePoster submission.
- > Examples include: presenter information, supplemental abstract, category/keywords, etc.
- > Optional: MP3/audio file collection for poster annotation/presentation.

### File Compatibility and Conversion

- > Accept ePoster submissions in virtually any format. Most common file formats are Microsoft PowerPoint (PPT) and portable document format (PDF).
- > Real-time conversion of poster submission files.
- > Instant poster submission preview.

### Poster Viewer

- > Controlled access to ePoster viewer (e.g., public access or open to registrants only).
- > Browse/search poster submissions based on any collected criteria.
- > Built-in dynamic poster viewer permits zoom and panning for detailed poster viewing.
- > Contact options for direct communication between poster viewer and authors.

## ePosters 1.2

ePosters 1.2 is an online conference poster submission and viewing system that simplifies the process of ePoster collection and distribution. With ePosters you can allow presenters to upload an electronic copy of their conference poster for online distribution to conference attendees. With options to both browse and search poster submissions, listen to audio presentations by the poster author, and highlight ground-breaking/award-winning posters, SPLtrak's ePoster system provides conference attendees an enhanced educational experience.

### Highlighted Features

- > Simple submission process using the same PowerPoint/PDF file used for poster printing.
- > Ability to include audio presentations with ePoster submissions.
- > Direct linkage to complete abstract/manuscript submission.
- > Dynamic poster viewer permitting detailed poster presentation on any size monitor.

### Benefits of ePoster Systems

- > Enhances the conference poster experience.
- > Allows attendees to either preview posters prior to conference or to view posters missed during conference poster sessions.
- > Category/keyword browsing and searching permits easy access to posters of most interest to each attendee.

### System Requirements

- > Any web browser (Mac/PC/Unix)
- > Internet connection
- > Adobe Flash Player (for dynamic image viewer)
